

ICT GOLF CART STANDARD OPERATING PROCEDURE

Requirements

1. Complete the Campus Unlicensed Motorized Vehicle Operators Brief
2. Complete the departmental driver approval form
3. Receive in-person safety and operation training from Engineer

Scope of use

- Authorized users can use the electric golf cart to move items (aggregates, batches, etc.) between MPF and the main building or to any other parts of ICT facilities such as ATLAS yard.
- Do not operate on the roads outside the portion to MPF, and ATLAS

Rules

- I. Pick up the key from designated location in Engineers office and initial
- II. Maximum of two persons
- III. Do not start vehicle until all occupants are fully seated
- IV. Drive slowly in turns. Remember vehicle has no seat belts nor doors
- V. Keep right. All other motorized vehicles have right of way
- VI. Keep entire body inside vehicle when in operation
- VII. Never attempt jumps
- VIII. Avoid extreme braking
- IX. When in MPF, park the cart in the large soil bed room accessed using the front garage door and leave the key in the bin next to the driver
- X. At the end of the day cart must be parked in Highbay C and plugged in to the charge (if it was less than 20% charged).
- XI. The last person should return the key to the designated location at the Engineer's office. If after hours, then place the key in the dropbox.
- XII. Transfer of use to another person:
 - a. Verbal confirmation between current user and new user is required
 - b. New user must initial sign-out sheet at Engineer's office ASAP
 - c. New user is now responsible for completing use of the vehicle

ICT GOLF CART STANDARD OPERATING PROCEDURE

Operation

- Check out the key.
- Load items in the bed if needed. Close the tailgate.
- Sit in the cabin.
- Insert the key into the ignition and turn clockwise.
- Press the shift button (top for **FORWARD** and bottom for **REVERSE**). The small digital indicator will display the direction selected

- The brake pedal is down when the golf cart is parked. Place your feet on the right side and push hard to release the paddle.

- Gently press the **GO** pedal. Remember it is an electric vehicle and will have near instantaneous torque. So be gentle on the pedal otherwise it will move too fast.

- Remember to slow down at turns and when entering the building.
- Use HORN when approaching buildings to notify users. Remember this golf cart is incredibly quiet. It is located on the left of the steering column

- If you need to make a stop, press the **STOP** pedal. Be careful not to press the PARK portion.
- Park at designated location in MPF. Return shifter to **NEUTRAL** and press the **PARK** portion of the STOP pedal.

- When parking the golf cart, please remember to turn off the cart switch to conserve the battery.
- Return cart to designated location in Higbay C.
- Remove the charge cable located at the front. **PLUG** it into a regular outlet to recharge (if the battery level shown on the small display is less than 20%).
